All the activities were very helpful for my classes. I loved debating about how we teach English and how we can change it. The timetable was the only tiring thing. May be because of the weather.

It has been a very useful experience for me. Thank you very much and continue teaching in this way.

I think it would be beter for us to have more free time to visit the city, one day at least. And please don't change. You are the best.

I would suggest that the CLP project class hours should be on Thursday morning instead of in the afternoon. And the workshops which are more dynamic in the afternoon. We are fresher in the morning and can think better.

I would like to have a list with explanantions of all the activities that we have done.

I'd like to do more courses like this one. September would be a better month to do it.

Thanks for everything! Congratulations. The week was great!

Great sources of practical ideas for class + English fluency development. Great job! We would like to have the course in September. The heat was unbearable in July.

Perhaps they could have given us more material to use in class, such as web pages, etc.

I had the time of my life. There was such positive interaction. The teachers were excellent, very professional and also had a great rapport wit

Let us repaet the course soon! It was phenomenal; superb! The air conditioning should be addressed before next year's course.

This course has given me many ideas to improve my classes.

The rooms were not appropriate because of the heat. The different levels in teachers make some of them feel inferior making them not to participate. The length of the course was too much without free time.

It has been really enjoyable and useful. I'll come back next year if I can.

Maybe going on the 75" workshops after lunch.

Thank you for all! Next immersion not in July, please!!

Great training!! It's something we should have had before. Great professionals, experienced and hard-working. They've given us great ideas to put into practice in our future classes.

The course could be much better in September. It was so much hot. That has been a difficulty in my concentration.

Perhaps more time between classes because my impression has been that we didn't have time enough for anything (between classes). Very good in general. Well prepared, well organized and we are very satisfied with the teachers' attitude; they are very concerned with student's learning. Thank you!

I really enjoyed the course. What's more I think it really useful. If I could make a suggestion I would like you to introduce more activities outside of the building as it's really hard work to keep a constant attention in this environment. Thank you!

I had a wonderful time here. I've learned many things. It was an inspiration for me in many different ways. Now I have activities, projects and the most important thing the methodology to use it in the classroom. I hope in the future I'll have a new possibility to participate in a course like this.

I think I have learned a lot and of course I have practised a lot, but now I need time to reflect on what I have lived and experienced. I would like to repeat this amazing experience next summer. Congratulations to all for your great job!!

It's been a great week, very profitable and demanding. Sometimes I've missed handouts or somewhere to download them from of some very interesting activities, as they would be ready-to-use in our classrooms.

I've been to many places both in the UK and Spain and I have taken a lot of methodology courses for English teachers and this has been the best. Well-organised, qualified teachers, always ready to help and motivate you. We've done a lot of work, we've had time to speak to our colleagues, learn about other ways of teaching, and the time shared with everyone has been rewarding. A great time! Thanks a lot!!
